

HARSHIT CHORDIYA

SOFTWARE ENGINEER

Melbourne 3183, Australia | 0494387182 | hchordiya6@gmail.com | [LinkedIn](#) | [Github](#) | harshitchordiya.com
Work Rights: Temporary Graduate Visa (subclass 485)

PROFESSIONAL SUMMARY

Junior Software Developer and recent Computer Science graduate with strong foundations in **C#, object-oriented programming, and full-stack development**. Experienced building end-to-end applications using **.NET/C#, SQL databases, REST APIs, and web technologies (HTML, CSS, JavaScript)**, with hands-on exposure to **AWS (EC2, S3, RDS, IAM)** and cloud deployment. Eager to learn ASP.NET MVC, WPF, IIS hosting, and enterprise-grade systems while contributing to real-world identity and security software.

EDUCATION

RMIT University

Feb 2023 — Dec 2025

Bachelor of Computer Science, Melbourne, Australia
Majored in Full-stack & Cloud

KEY SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C++

Core: Object-Oriented Design, Data Structures, REST APIs, Debugging & Troubleshooting

Frontend: React, Next.js, HTML/CSS, Tailwind CSS, Responsive Design

Backend: Net, Node.js, Express.js, Authentication & Authorization

Databases: PostgreSQL, MongoDB, MySQL

Cloud & Deployment: AWS (EC2, S3), Docker, CI/CD (GitHub Actions), Azure

Tools & Practices: Git, GitHub, Agile, Component-Based Architecture

Testing: xUnit / NUnit / Jest / React Testing Library

Employability: Problem Solving, Team Collaboration, Clear Communication, Adaptability, Ownership

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Bridge Marketplace

Dec 2024 — Mar 2025

New York, USA (Remote)

Bridge Marketplace is a fintech company which connects businesses with suitable lending partners.

- Built a purchase order scorecard dashboard using Python, Flask, and Dash, analysing large Excel and CSV datasets to surface key financial metrics.
- Developed Python-based data pipelines (Pandas, SQL) to clean, validate, and aggregate transactional data, improving data quality and consistency for downstream systems.
- Implemented AI-powered OCR workflows to extract structured data from variably formatted financial statements, reducing manual processing and data errors.
- Integrated LLM-based processing (ChatGPT API) to assist with interpreting extracted financial data and structuring it for downstream lender-matching workflows.
- Worked in a remote Agile environment, owning feature delivery and presenting sprint demos, strengthening collaboration, communication, and time management skills.

Freelance Full-Stack Developer, Self Employed

Mar 2025 — Present

Remote

- Delivered **end-to-end software features** from requirements through implementation and deployment
- Built backend services and APIs using **object-oriented design principles** and structured data models
- Developed responsive web interfaces using **HTML5, CSS3, JavaScript, and Bootstrap-style layouts**
- Worked with **SQL databases**, handling schema design, queries, and data validation
- Deployed applications to **AWS (EC2, S3)** and managed environments using IAM permissions
- Collaborated closely with clients, refining requirements and iterating based on feedback

Software Developer, RISC at RMIT University

Apr 2024 — Dec 2024

Melbourne, Australia

RISC is a student-led technical club at RMIT University focused on cybersecurity and hands-on projects.

- Contributed to **full-stack application development** for internal research platforms
- Built and enhanced backend components using **OOP principles and clean architecture**
- Assisted with **API integration, debugging, and performance improvements**
- Worked within a **Git-based workflow** and agile development environment
- Supported documentation, handover, and maintainability of systems

Team Member, McDonald's Elsternwick

Apr 2024 — Jan 2026

Melbourne, Australia

- Communicate effectively with customers to understand their needs and come up with solutions.
- Work in 3+ departments across 3+ stores to boost productivity and meet team targets as needed.

PROJECTS

TidyLens- Mixed Reality Inventory Tracking

- Built an **end-to-end C#-based application** integrating Unity (C#) with backend services
- Designed REST APIs for real-time data exchange and persistence
- Implemented structured **SQL database models** for inventory and tracking data
- Deployed backend services on a Linux server and optimised performance (≈90% lag reduction)
- Applied **OOP principles**, debugging, and performance tuning

Tech stack: Unity, C#, Python, Flask, REST, YOLOv5, MySQL, Linux, Deployment

Purchase Order Scorecard Dashboard

- KPI dashboards, data cleaning/validation, stakeholder reporting, release notes/docs, support.
- Built Python data pipelines (Pandas) to clean/validate/aggregate purchase order & invoice datasets (Excel/CSV).
- Standardised fields from variably formatted documents using OCR-assisted extraction for downstream analytics workflows.
- Produced dashboard-ready outputs and documented assumptions/edge cases for maintainability.

Tech stack: Python, Pandas, Dash, Excel/CSV, OCR

Climate Data Analyzer

- Developed a **Java-based web application** with SQL-backed data access
- Designed database schemas and wrote optimized queries
- Implemented input validation and improved query performance

Tech stack: Java, HTML & CSS, MySQL, SQLite
